

### Things to Complete on the First Home Visit

1. Parent Orientation packet/ especially the EHS parent handbook
2. Explain how the program works and that parents are expected to be involved in all aspects. Try to set a Home visit schedule.
3. Front Page of the Family Partnership Agreement and Home Visit Guidelines
4. Any Health paperwork or ASQs that were not finished at the health screening.(you may have been given some to complete because they didn't bring to their screening or are not being screened at this time)
5. Give out and explain the dental calendar/ hygiene packet.
6. Family Visit Lesson plan- make sure parent signs it.
7. Pencil Box with supplies if you wish. This can also be given out later. (even if you have small babies, you can give it to the parent to use for things you might do on a HV)
